Dear Internship Coordinator,

I hope you are having a great week.

My name is Lakshay Chauhan, and I am currently a fresher studying Computer Science (CS, AI & ML) at VIT Bhopal. I have been following Google's recent work in artificial intelligence, and I am very impressed by your team's innovative approach.

I am writing to express my strong interest in joining Google as a summer intern. Through my coursework and projects, I have developed a solid foundation in data analysis and programming, and I am eager to contribute these skills while learning from industry experts.

Could you please let me know if applications for summer internships will be opening soon, or if there is a specific application process I should follow? I would greatly appreciate any guidance you could provide.

Thank you very much for your time and consideration.

Best regards,
Lakshay Chauhan
