SOCIAL MEDIA DO'S AND DON'TS

Do's	Don'ts
Adjust your privacy settings so you can control who can see your posts and personal information.	Avoid posting offensive, discriminatory, or overly controversial content.
Use your profile to highlight your academic projects, volunteering, and professional skills.	Don't publicly criticize or complain about your professors, university staff, or employers.
Always think before posting because once something is online, it can stay there permanently.	Never share sensitive personal details such as your home address or your daily routine.
Participate in online discussions politely and respectfully, even when you disagree.	Avoid posting pictures or videos that show illegal activities or excessive partying.
If someone tags you in an inappropriate photo, take action and remove the tag promptly.	Don't assume that deleting a post or sharing it privately means it cannot be saved, screenshotted, or shared.
